SKILLS SUMMARY

- **Analytical:** Applied data-driven problem solving and process optimization while developing full-stack applications and supporting IT systems to streamline event registration and internal workflows.
- **Technical:** Strong technical expertise across full-stack development and cloud platforms, including Java, Python, JavaScript, C#, HTML/CSS, React, Node.js, Tailwind CSS, ASP.NET, Power BI, Selenium, and Microsoft Azure, with hands-on experience in agile development environments.

EDUCATION

Bachelor of Computer Information Systems

Sep 2018 – Sep 2023

Mount Royal University, Calgary, AB

- Dean's Honor Roll 2019, 2020, 2021.

Relevant Coursework

Web Development, Programming, Database Systems, Computer Architecture & Operating Systems, Network Infrastructure, Systems Administration, Project Management

Capstone Project — Shira Migration Platform

Designed and developed a full-stack university migration platform enabling international students to explore relevant academic programs based on transcript evaluation. Built using SQL, React, Node.js, JWT authentication, and Figma for UI/UX design.

EXPERIENCE

Freelance Support, Calgary, AB

Jan 2025 - Present

- Assisted multiple freelance developers in delivering client projects, contributing to development, debugging, and implementation

Best Buy Canada, Calgary, AB

Oct 2024 - Present

Geek Squad Agent

- Delivered technical support for 15–20 devices weekly, diagnosing hardware/software issues and ensuring smooth resolutions with ~85% customer satisfaction.
- Assisted multiple departments simultaneously, offering technical insight during sales interactions and managing logistics for shipping and repairs.

Amrit Sagar Foundation, Calgary, AB

Jan 2023 - June 2024

Full Stack Developer

- Partnered with stakeholders to gather requirements and translate event workflows into scalable digital solutions with real-time data access
- Led full-stack development of a secure, real-time event management platform, building encrypted REST APIs and reducing manual workload by 70% through automation
- Developed responsive frontend features using React and Tailwind, ensuring data integrity, performance, and intuitive user experience within strict budget constraints

Alberta Health Services, Calgary, AB

Jan 2022 - Aug 2022

Information Technology Student

- Collaborated with an agile development team to build user-friendly front-end interfaces using HTML, CSS, and JavaScript, improving internal process efficiency by 25%
- Managed 100+ monthly IT support tickets through ServiceNow, maintaining SLA compliance and contributing to a 20% increase in user satisfaction
- Designed functional UI prototypes using Figma and provided specialized Microsoft SharePoint support, aligning IT solutions with end-user needs
